

Hello,

Here at CU Science Discovery we hope to provide a comfortable environment for your child to grow. Our wish is that your child can find active involvement and interest in the fun activities that we have planned for the entire week. As a parent to your child, there may be strategies and suggestions you have to offer that will serve as beneficial to our program and your child's camp experience. Below are a few questions regarding possible tips or tricks that you may be able to offer to help ensure camp runs smoothly and happily for all. If a guideline question is not applicable, not to worry! Just simply leave the intended response space blank. We look forward to using your suggestions ☺

Thank you kindly,
CU Science Discovery

- ✚ **What camp is your child attending? Are they attending any other camps throughout the summer? If so what camps/dates?**

- ✚ **Do you have any key phrases or frequently used techniques that help support your child's cooperation and engagement?**

- ✚ **Are there any behavioral triggers that can be adjusted in the classroom? (i.e. noise levels, unwanted peer attention, stress when transitioning through activities, lighting, seating arrangement, etc.)**

- ✚ **Are there any environmental factors that can be adjusted in the classroom? (i.e. noise levels, lighting, seating arrangement, closing windows and doors, etc.)**

- ✚ **Where in classroom placement does your child thrive best? (i.e. front, middle or back of the room, in groups, individually, doesn't matter, etc.)**

- ✚ **If you have any more specific comments or suggestions, please explain below:**
